

Munroe Falls has been ranked one of 50 Best Suburbs in America according to Business Insider.

After examining data on nearly 300 suburbs, Business Insider put together a list of the 50 best suburbs in America. For this list, they considered suburbs with populations between 5,000 and 100,000 within 24.9 miles of the nearest metropolitan area. They also factored in average commute times, median household income, poverty and FBI crime rates, public school ratings from GreatSchools.org, and a measure of housing affordability.

Considered a bedroom community, Munroe Falls is ranked number 33 and is the smallest suburb (Pop. 5012 according to 2010 US Census) to make the list. Munroe Falls has virtually no violent crime, an easy 22.5 minute commute from Akron, and a median household income of \$ 66,691.
