

The City of Munroe Falls leaf pick-up program will start the week of October 30th for a six week rotational period ending December 8th. The City will make a minimum of two passes in each of the leaf pickup zones in the city during this time.

Leaf Pick-up Guidelines:

- Place leaves at the curb or the roadside of your **ditch before 7:00 am on the Monday of your scheduled collection week**. Pick up cannot be guaranteed after this time.
- Rake leaves to the edge of the roadway or back of curb
- Avoid placing leaf piles near trees, signs, mailboxes, fire hydrants and streetlights.
- Remove vehicles from the street during collection week. Leaves under and behind parked cars cannot be collected.
- Do not include material such as **trash, rocks, branches, twigs, brush, yard waste or grass clippings**. These items will damage the leaf vacuum machines. Leaves will **not** be collected if they contain any of the above items

Crews *may* pick up bulk piles of leaves in advance when workloads permit; returning on regularly scheduled weeks.

The Munroe Falls Leaf Collection Program is intended only to collect leaves that have been properly bunched and placed at the roadway **within the right-of-way** for disposal during a six week period. **DO NOT PILE LEAVES IN THE STREET OR OBSTRUCT TRAFFIC**

There is a very small window of opportunity to collect leaves from the time they fall until winter weather begins. Once the leaves are covered by snow or are frozen, the leaf vacuum machines can't collect them and service crews must attend to snow removal operations.

Alternative Leaf Disposal

- Utilize a mulching lawnmower and mulch leaves back into the lawn. This provides nutrients for the soil.
- Place leaves in and around plant beds and under trees and shrubs. Again, this provides good nutrients for the soil and plants, also providing insulation for the plants.
- Place leaves in with your regular trash (not recycle bin)
