**CITY OF MUNROE FALLS ANNOUNCES
NEW FIXED RATE FOR NATURAL GAS AGGREGATION PROGRAM**

Munroe Falls, Ohio (February xx, 2017) – City of Munroe Falls officials would like to remind residents and small businesses to look for a mailer to arrive on or about March 3, 2017 concerning the natural gas aggregation program offer from Constellation Energy Services - Natural Gas, LLC (Constellation). Residents and small businesses currently participating in the city's natural gas program will receive a notice informing them of the new rate of \$3.636/Mcf for gas consumed April 2017 through March 2018. These customers do not need to do anything to remain in the program and receive the new rate.

Newly eligible account holders who receive their gas supply from Dominion East Ohio will receive an opt-out notice from Constellation explaining the rate, terms and conditions, and methods for opting out of the city's aggregation program. These accounts will be added to the program unless they opt out as indicated in the letter.

Mayor James Armstrong said, "We are pleased to have been able to secure this low rate for our residents and businesses. This rate provides price protection for an entire year and gives customers the ability to opt-out free of charge at any time for any reason."

"Constellation is proud to continue to provide residents and small businesses in the City of Munroe Falls with price certainty and the same hassle-free experience we offer all customers," said Kevin Klages, SVP Mass Markets for Constellation. "As a longtime competitive energy supplier in Ohio, we look forward to supplying natural gas to Munroe Falls' residential and small business customers."

There are two ways new customers can join the city's program. First, residents and small businesses may call Constellation at 844-516-5248. Second, customers may join the program online at www.constellation.com/munroefalls.

Customers served by another supplier should be aware of the obligations in their existing contract before joining the City of Munroe Falls' program, as many suppliers charge a penalty for early termination. Customers wishing to join the program must be in good standing with their bill payment and cannot be part of the utility's percentage of income payment program (PIPP).

The City of Munroe Falls is pleased to make this program possible. However, due to the large volume of calls city officials ask that residents contact Constellation directly regarding questions about the program.
